#### **Appendix**

#### **Non-GAAP Financial Measures**

The non-GAAP financial measures provided should be viewed in addition to, and not as an alternative for, results prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") that are presented in this press release.

To supplement the financial information provided, the Company has presented Organic Net Sales, Adjusted EBITDA, Constant Currency Adjusted EBITDA, Adjusted EPS, and Free Cash Flow which are considered non-GAAP financial measures. The non-GAAP financial measures presented may differ from similarly titled non- GAAP financial measures presented by other companies, and other companies may not define these non-GAAP financial measures in the same way. These measures are not substitutes for their comparable GAAP financial measures, such as net sales, net income/(loss), diluted earnings per share, or other measures prescribed by GAAP, and there are limitations to using non-GAAP financial measures.

Management uses these non-GAAP financial measures to assist in comparing the Company's performance on a consistent basis for purposes of business decision making by removing the impact of certain items that management believes do not directly reflect the Company's underlying operations. Management believes that presenting the Company's non-GAAP financial measures (i.e., Organic Net Sales, Adjusted EBITDA, Constant Currency Adjusted EBITDA, and Adjusted EPS) is useful to investors because it (i) provides investors with meaningful supplemental information regarding financial performance by excluding certain items, (ii) permits investors to view performance using the same tools that management uses to budget, make operating and strategic decisions, and evaluate historical performance, and (iii) otherwise provides supplemental information that may be useful to investors in evaluating the Company's results. The Company believes that the presentation of these non-GAAP financial measures, when considered together with the corresponding GAAP financial measures and the reconciliations to those measures, provides investors with additional understanding of the factors and trends affecting the Company's business than could be obtained absent these disclosures.

Organic Net Sales is defined as net sales excluding, when they occur, the impact of currency, acquisitions and divestitures, and a 53rd week of shipments. The Company calculates the impact of currency on net sales by holding exchange rates constant at the previous year's exchange rate, with the exception of highly inflationary subsidiaries, for which the Company calculates the previous year's results using the current year's exchange rate. Organic Net Sales is a tool that can assist management and investors in comparing the Company's performance on a consistent basis by removing the impact of certain items that management believes do not directly reflect the Company's underlying operations. Adjusted EBITDA is defined as net income/(loss) from continuing operations before interest expense, other expense/(income), provision for/(benefit from) income taxes, and depreciation and amortization (excluding integration and restructuring expenses); in addition to these adjustments, the Company excludes, when they occur, the impacts of integration and restructuring expenses, deal costs, unrealized losses/(gains) on commodity hedges, impairment losses, and equity award compensation expense (excluding integration and restructuring expenses).

The Company also presents Adjusted EBITDA on a constant currency basis. The Company calculates the impact of currency on Adjusted EBITDA by holding exchange rates constant at the previous year's exchange rate, with the exception of highly inflationary subsidiaries, for which it calculates the previous year's results using the current year's exchange rate. Adjusted EBITDA and Constant Currency Adjusted EBITDA are tools that can assist management and investors in comparing the Company's performance on a consistent basis by removing the impact of certain items that management believes do not directly reflect the Company's underlying operations.

Adjusted EPS is defined as diluted earnings per share excluding, when they occur, the impacts of integration and restructuring expenses, deal costs, unrealized losses/(gains) on commodity hedges, impairment losses, losses/(gains) on the sale of a business, other losses/(gains) related to acquisitions and divestitures (e.g., tax and hedging impacts), nonmonetary currency devaluation (e.g., remeasurement gains and losses), debt prepayment and extinguishment costs, and U.S. Tax Reform discrete income tax expense/(benefit), and including when they occur, adjustments to reflect preferred stock dividend payments on an accrual basis. The Company believes Adjusted EPS provides important comparability of underlying operating results, allowing investors and management to assess operating performance on a consistent basis.

Free Cash Flow is defined as net cash provided by/(used for) operating activities less capital expenditures. The Company believes Free Cash Flow provides a measure of the Company's core operating performance, the cash-generating capabilities of the Company's business operations, and is one factor used in determining the amount of cash available for debt repayments, dividends, acquisitions, share repurchases, and other corporate purposes. The use of this non-GAAP measure does not imply or represent the residual cash flow for discretionary expenditures since the Company has certain nondiscretionary obligations such as debt service that are not deducted from the measure.

See the attached schedules for supplemental financial data, which includes the financial information, the non-GAAP financial measures and corresponding reconciliations to the comparable GAAP financial measures for the relevant periods.
